## Business Case for Breastfeeding

---

As part of the Affordable Care Act, **worksites are required** to provide flexible break times for nursing mothers to express milk at work in a private space that is not a bathroom.

Kansas Academy of Family Physicians provides **FREE policy assistance and equipment\*** for worksites to develop lactation support policies that meet these requirements.

*\*Eligible worksites will receive a hospital-grade breast pump, rocking chair, dorm-sized refrigerator and four lactation pumps.*

---
